# FingerPrints Point of Sale

Faster Service, At Your Fingertips.

**Purpose-built for the fast-paced, high-volume QSR environment, FingerPrints pairs advanced hardware and intuitive software to enhance speed, ensure reliability and accelerate performance.**

Informed by years of experience serving QSRs and an unwavering focus on practicality and performance, FingerPrints is currently delivering value for more than 1,100 QSR restaurants in multiple countries.

## What Sets FingerPrints Apart?

### Designed for QSR.

FingerPrints is designed to support the quick service restaurant environment's high standards for order accuracy and speed of service.

### Built on Windows.

Built on the Windows operating system, FingerPrints maximizes ease of use and performance for QSR franchisees, restaurant managers and crew.

### Supports Diverse Menu Items and Traffic Patterns.

FingerPrints flexibly accommodates QSRs with large, diverse menus, as well as varying traffic patterns across hour of the day and day of the week.

### Facilitates Continual Improvement.

FingerPrints pairs practical point of sale functionality with web-based reporting and tools to manage labor and inventory, enabling QSRs to continually improve restaurant efficiency and performance.

## Speed and Reliability Within Reach.

FingerPrints Point of Sale delivers practical functionality and outstanding usability, empowering quick service restaurants to improve speed of service and ensure reliability.

### Simplify Processes.

FingerPrints performs as an extension of your team. Through its clear and concise menu design, the system makes it effortless for crew to accurately and quickly ring in orders. With customizable screens and layouts, FingerPrints is equipped for brand-specific customization.

### Ensure Redundancy.

Downtime simply isn't an option in the QSR space, which is set apart by speed and convenience. That's why each FingerPrints terminal is fully and independently redundant, so your restaurant can focus on increasing sales and satisfaction, without missing a beat.

### Reduce Errors.

Using an integrated payment system, FingerPrints ensures that customers are charged the correct amount every time, effectively eliminating errors. The system performs automated batch close with end of day reports, ensuring your money is in your account each day.

### Maximize Security.

FingerPrints enables franchises to flexibly decide who has permission to perform specific tasks like discounts and void items, and systematically reports exceptions for review and follow-up.

### Accelerate Performance.

FingerPrints is designed to enable faster processing during all day-parts and will keep running at lightning speed, even during peak hours, to provide the always-on reliability you need.

### Increase Sales.

Equipped with dynamic suggestive selling capabilities, FingerPrints presents contextual promotions on the point of sale screen, empowering crew to increase sales and guest satisfaction during each transaction.

### Engage Guests.

FingerPrints works seamlessly with loyalty programs and gift cards to engage guests and encourage frequent visits. The solution is payment processor independent and EMV-ready, enabling guests to check out in line with their preferred preferences.

## SICOMSERV™

FingerPrints Point of Sale delivers practical functionality and outstanding usability, empowering quick service restaurants to improve speed of service and ensure reliability.

Your restaurant is always running, and your support should be too. With FingerPrints, tap into skilled, 24x7 customer support via phone and messaging to ensure your POS is operating effectively and efficiently at all times.
